

Quarterly Report For Minister Shawn Winstead

1-14-11

ECCO

The Ebenezer Center For Christian Opportunity will see the birth of a Director of Recreation in 2011. This position will allow us to better serve the community by better utilizing the facility. This person will program activities such as sports leagues, chess clubs, exercise classes ect. With this in mind please make sure you get your ministry dates on the books as quickly as possible because programming for the leisure activities will begin soon.

Executive Pastor

In the new year my vision for Ebenezer as Executive Pastor all revolves around communication. It is my goal that as a staff and as a church we get information to the congregation in an efficient and useful way. To ensure that this happens we will be implementing things like wall placards detailing the daily schedule and usage of that particular room outside the door of each room. We will continue to work with Gwen Terry to make sure that you can always get important information from the website www.ebenezerucc.com. I am proud to say that we will officially be opening "The Place" on January 30th. The Place will serve as a church annex of sorts; housing a computer lab, Y.E.A., meeting space for ministries, and Minister Dawson's office.

Also I will do a better job of acting as a liaison between the ministries and the church. Again, it is very important that we communicate on all fronts so I will also be enacting tools and procedures to ensure that communication happens.

Media

In our continuing effort to make sure you get information that is pertinent to you in the manner that is most effective; we will be installing a TV monitor in the Welcome Center. This monitor will be located above the receptionist desk and will display announcements and other church information. It is my belief that by putting the information in a high traffic area and making it very visible people are more apt to see it and heed it. Also, as it pertains to our media endeavors here at EUCC you can now not only purchase CD's immediately after service but you may also purchase DVD's immediately after service. The computer ministry will also continue to bring all of the churches technical support in house.
